	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● User is able to type in the expense with a short description ● Save the input into a CSV file ● Print out the budget remaining for the user to see	**Schedule - (For V2.0+)** ● Split the budget into categories ● User enters which category they spent money in ● Summary of money remaining in each category is printed out for the user to see
Not Important	**Delegate - (Use a library)** ● FileWriter to append the CSV file with the users input ● BufferedReader to read the CSV file and output the remaining budget ● Splitting the user input with String methods	**Delete - (Cut it)** ● Color coding each category ● Having one file for each category, which would mean that there would be multiple files ● Graphs or charts with categories and each amount spent displayed
